3M™ Laser Markable Label Material 7848

Offers long-term durability, resisting wear from temperature and chemicals.

3M Laser Markable Label Material 7848

The 3M Laser Markable Label Material 7848 Matt Silver/Black is a specialty film label material where a laser can ablate the top layer of a dual-layer face stock to create an image. The same laser can also "kiss cut" the label to size, maximising flexibility for producing variable labels for durable applications.

Brittle face stock material provides destructibility to meet security labelling requirements. 3M's #350 modified acrylic adhesive offers good adhesion on LSE/HSE plastics with high initial tack.

3M Acrylic Laser Markable Label Materials provide excellent chemical and environmental resistance. Two-layered film construction provides excellent long-term performance.

For applications requiring longer durability over the life of a labelled item, 3M Laser Markable Label Materials provide multiple production and performance benefits.

Product Information

- Label material that can survive a wide range of challenging environments and manufacturing processes.
- High-performance labels designed for a wide range of purposes.
- Abrasion resistant.
- Excellent temperature and chemical resistance.
- Can be used for tamper indication.

Application Ideas

Durable good marking, under hood labels, barcode labels, asset labels, security labels.

We can print to suit your application!

Converting

Converting to die cutting can add value to any product by increasing design flexibility and freeing designers from many constraints, resulting in higher quality finished products.

Safety First!

Do you have the right safety PPE for your employees? When involved with industrial abrasives or aerosol spray adhesives and cleaners, safety glasses or goggles, as well as a respirator may be the workplace safety you need.
